RESOLUTION OF THE COMMON COUNCIL			
Resolution creating a policy for Capital Projects; Specifically increasing the current threshold of \$5,000 to \$10,000			
Committee:	Finance approved on February 5, 2019		
Fiscal Impact:	N/A		
File Number:	19-R06	Date:	February 11, 2019

WHEREAS, the City audit in notes to the financial statements dated December 31, 2018 provide the following definitions of Capital assets:

Property, plant, equipment and infrastructure assets are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial individual cost of at least \$5,000 in an estimated useful life in excess of a year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized, and

WHEREAS, capital expenditures under \$10,000 are more appropriately placed in a specific department's annual operating budget, and

WHEREAS, most communities of Lake Geneva's size and organizational structure have defined their capital assets with an initial individual cost of at least \$10,000, and

WHEREAS, the proposed Capital Projects Policy is intended to provide guidelines during the preparation of the annual budget and ensure that appropriations intended to pay for Capital Improvements (Capital assets as defined by the City auditor) are restricted as used within a prescribed order.

NOW, THEREFORE, be it resolved by the Lake Geneva Common Council that the following Capital Project Policy is hereby approved:

To be included in the **Capital Improvement Fund** a project must have a total cost of at least \$10,000, have a useful life of more than one year and is for new construction, expansion, renovation, or for an existing facility or facilities. Project costs can include the cost of land, engineering, architectural planning, and contract services needed to complete the project.
