Subject: Review of Certified Survey Map for Woodhill Farms Nursery in the
Town of Linn

We have completed the extraterritorial review of a Certified Survey Map prepared by Joseph Brahm of Schmidt Engineering. Our review was conducted to determine compliance with Chapter 236 of the Wisconsin State Statutes, Chapter 66-36 of the City of Lake Geneva Municipal Code and good surveying practices. The Certified Survey Map dated August 8, 2015 was reviewed.

Comments for the Certified Survey Map:

- The word "Nursery" is misspelled in the property owner label on each sheet.

We recommend approval of the Certified Survey Map contingent upon enclosed surveyor's comments. Although the material has been reviewed, the surveyor is ultimately responsible for the thoroughness and accuracy of the Certified Survey Map with state statutes and municipal city code.

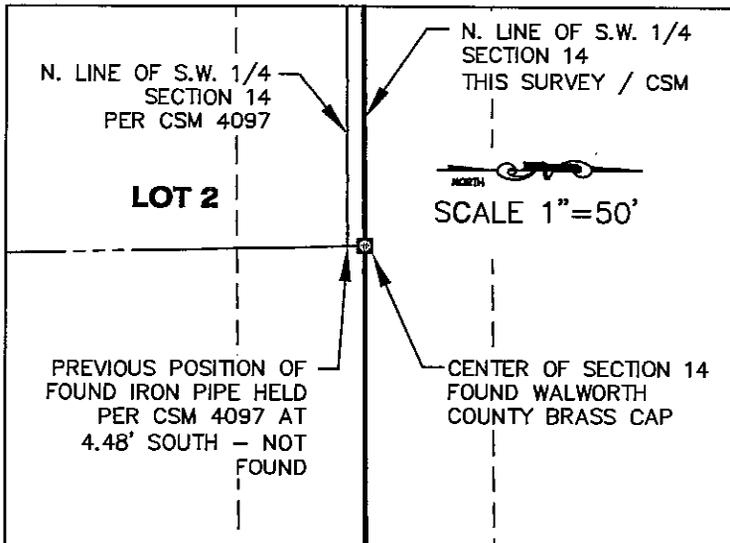

Please contact me if you have any questions or comments pertaining to this project.

Planned Development (Shoppes On 50)
Redevelopment of Sears Hometown Property
351 Peller Road, Lake Geneva, WI

Written Description

The proposed redevelopment is located at 351 Peller Road, located on the Northeast corner of Peller Road and Highway 50. The adjacent parcels are currently occupied by Home Depot to the north and Lake Geneva Mobile to the east. The proposed redevelopment, Shoppes on 50, will be an upscale 4-tenant building having a footprint of 7,642 S.F. The anchoring users of the building will be Noodles & Company and Qdoba.

The redevelopment will include demolishing the existing Sears Hometown building and redesigning of the site to include a newly constructed brick and masonry building with four sided architecture, decorative fencing wrapping two patios overlooking Highway 50 on the south side of the building, a new ground sign with a brick base to match the building along STH 50, updated landscaping, as well as improving drainage, parking, and overall site vehicular circulation within the site. Two new driveway locations are also proposed onto Peller Road. The Tenants proposed for this redevelopment will provide additional services to the local community and seasonal population including upscale, national fast casual restaurants and other national retail Tenants.

The proposed Floor Area Ratio for the project will be 17.4% of the site, which is below the maximum allowable of 30%. The Landscaped Surface Ratio for the site will also exceed the underlying zoning requirements with a ratio of 26.9%.

The buildings will be constructed in a manner that is consistent with similar retail buildings constructed along Edwards Blvd in the past few years. The primary exterior materials will be split faced architectural masonry and brick with EFIS (synthetic stucco) in smaller areas for signage and decorative building lighting. Architectural elements will be located on all sides of the building with the entrances located on the north side of the building with Tenant prototypical design elements incorporated into the overall design.

The development will be in compliance with the majority of the zoning standards required by the underlying zoning district of Planned Business. A Planned Development is proposed to obtain the following exceptions:

1. The applicant requests that the minimum building setback be reduced from 40' along the street ROW to 5'. This exception will allow the remainder of the site to be maximized for parking. The

applicant feels that the presence of the DOT vision triangle at the roadway intersection and wide public terrace area along STH 50 provides adequate separation from the existing roadways.

2. The applicant requests that the pavement setback be reduced from 10' along the street ROW line to 5'. This exception will allow patios to be placed off the back of the proposed building for both restaurant users. The applicant feels that the presence of the DOT vision triangle at the roadway intersection and wide terrace area along STH 50 provides adequate separation from the existing roadways.
3. The applicant requests an exception for 1 parking stall. Based on the building uses, 61 stalls are required, 60 stalls are proposed. This allows the parking dimensional requirements and setbacks to be met as well as the minimum driveway throat lengths required onto Peller Road.
4. The applicant requests an exception for interior landscape islands. Interior landscape islands are required for every 10 parking stalls. Due to the width of the parcel the parking area is better maximized by combining these required landscape islands into one bigger island located in the center of the parking area. Three interior landscape islands are required for a total of 500 S.F. The center island provided is 576 S.F. Also, landscape areas are proposed in the parking lot corners.
5. The applicant requests that the minimum ground sign setback requirement of 8' be reduced to 4'. This request is due to the fact that the ROW line adjacent to STH 50 is 88' from the highway's north pavement edge. This will allow the applicant to place the sign as close as possible to the highway and still allow adequate landscaping to be placed around the sign.

APPLICATION FOR CONDITIONAL USE
(justification of proposed use)

TRISTAN CRIST
MAGIC THEATRE

Proposed use: The premises are to be used for the purposes of operating a live performance theatre and related services and sales. Specifically, year-round performances of the Tristan Crist Illusion Show. A 75 minute live magic, comedy and illusion performance geared towards family audiences that has been featured for the previous 10 years at Circus World in Baraboo, WI.

Suite C in the 846 W. Main St. building is currently an empty 1,200 sq ft room located in between Boatyard Bagel Co. and Bona's Italian Kitchen. The proposed conditional use transforms the space into an intimate 60 seat venue that will showcase the Tristan Crist Illusion Show, drawing tourists to the downtown area and providing an evening entertainment event for families and contributing to the economic vitality of the Downtown area.

Projected employees and customers: The theatre will be run by one full time employee and 2 or 3 part time employees. On show days with one performance, the maximum number of customers will be 60 on days with two performances, the maximum number is 120.

Operational considerations: During peak summer months, the venue will operate 7 days a week with evening performances at 8:00 pm and occasional added shows at 4:00 pm. During off-season, the venue will operate on select weekends with shows at 7:00 pm and 2:00 pm. Water and sewer usage will be limited to patrons using the restrooms located in the building. Parking will most likely not become an issue since most audience members will be tourists who are already parked downtown during the day. The other businesses located in the building are typically closed by 8:00 pm, so traffic flow and noise will not become an issue or nuisance for them. In fact, the increased foot traffic in the building should help their businesses.

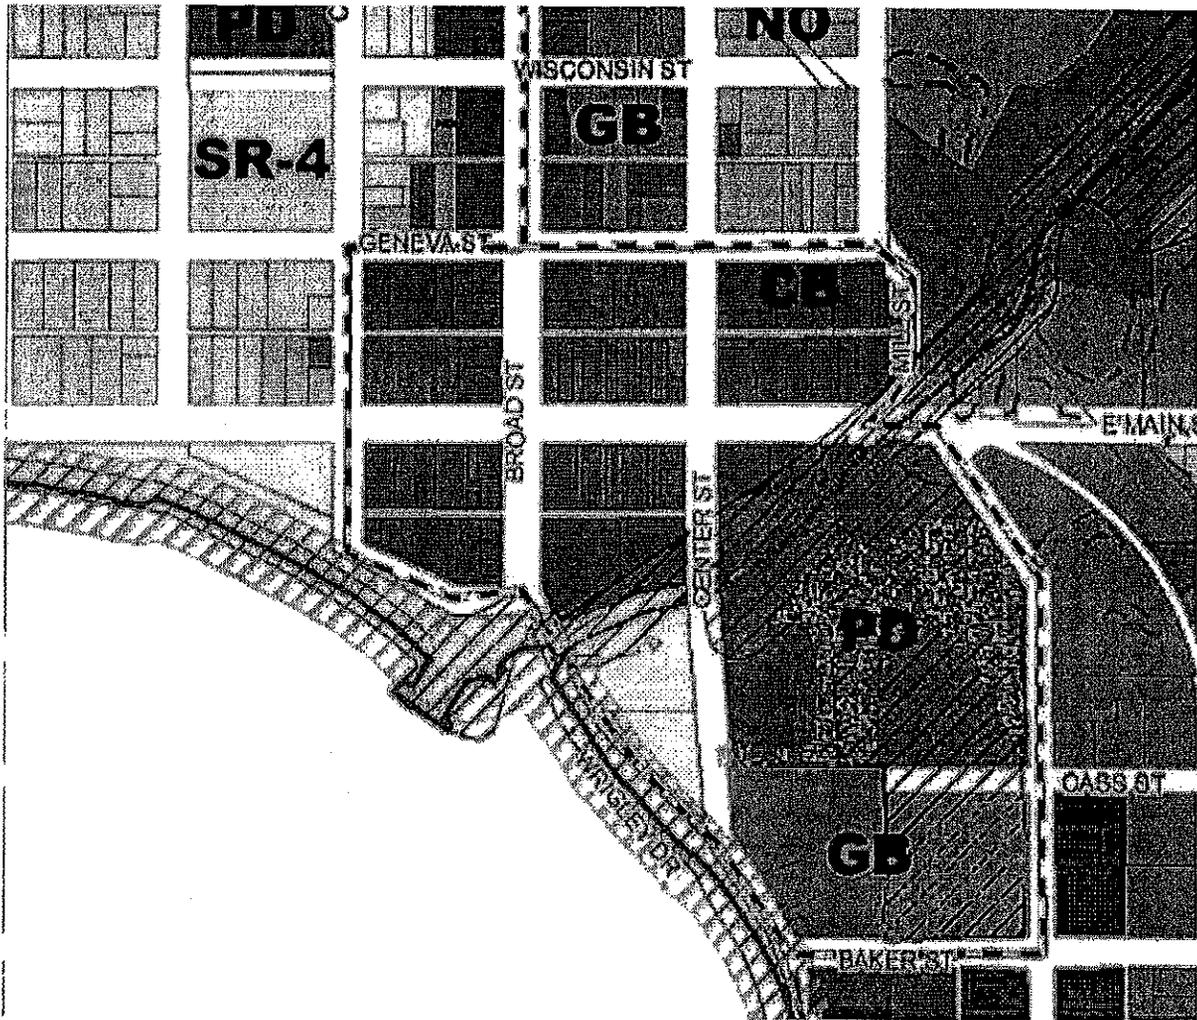

Signage: A sign similar to Bona's hanging sign will go to the left of the front door. See attached design for size and colors. There will also be a poster in the window to the left of the door showing show dates / times. This design may change and rotate depending on the season, upcoming shows, special show times, etc... All signage has been approved by the building owner.

Subject: 120 PROPERTIES, LLC ANNEXATION

Section 66.0217 (6), Wis. Stats., provides that the annexation of lands to cities and villages within a county having a population of 50,000 or more shall be reviewed by the Department of Administration in order to determine if the proposed annexation is in the public interest or against the public interest. The proposed annexation from the TOWN OF LYONS to the CITY OF LAKE GENEVA (see attached description) must be reviewed pursuant to the statute.

To assist us in making this determination, we urge that you promptly supply the data requested on the enclosed questionnaire (where possible) and return the questionnaire to the department.

The purpose of this questionnaire is to assist the department in determining "Whether the governmental services, including zoning, to be supplied to the territory could clearly be better supplied by the town...." The statute further stipulates that the department shall study the "shape of the proposed annexation and the homogeneity of the territory with the annexing municipality." In addition, we would appreciate receiving from you any comments or information bearing on governmental services or shape and homogeneity that would indicate whether the annexation is in or against the public interest.

Please return the questionnaire as soon as possible so that the information can be reviewed prior to the department's statutory deadline of August 16, 2015. Direct any questions and comments to Erich Schmidtke at (608) 264-6102. Thank you for your cooperation.

For additional information on annexation or other land use issues, visit our web site at <http://doa.wi.gov/municipalboundaryreview/>.

Sincerely,

Erich Schmidtke
